Message from the Guest Editors

Dear Colleagues,

Smart cities have been widely discussed over the last decade. Their potential to solve challenges related to the growth of urbanization, environmental issues and the worldwide trend of population aging are motivating research in this area. New technologies and digital services have been considered as important components in smart cities since they can connect service providers, users, infrastructures, and communities in a common ecosystem to support value co-creation.

This Special Issue seeks foundation-building research on smart cities and smart services. We seek original and innovative contributions on both theoretical and practical aspects of the following themes:

- New value brought by smart devices (smartphones, computers, tablets, wearables, etc.) to the daily life of service customers;
- The solutions and new approaches of technology usage related to the COVID-19 pandemic;
- The contribution of innovation and the development of smart services improving the resilience of society as a whole;
- New approaches, models, or frameworks that help the researchers and practitioners to foster the development of technology usage in smart city.

an Open Access Journal by MDPI

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many other databases.

Journal Rank: [JCR - Q2 \(Environmental Sciences\)](#) / [CiteScore - Q1 \(Geography, Planning and Development\)](#)
